**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a semiconductor device, classified in class 257, subclass 346.
- II. Claims 6-20, drawn to a process for making a semiconductor device, classified in class 438, subclass 303.

2. The inventions are distinct, each from the other because of the following reasons: inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example, the L-shaped spacers in the claimed product are formed by: blanket depositing a spacer insulating layer on the substrate, including the gate pattern; and anisotropically etching the insulating layer. In another and materially different process for forming the product as claimed, the L-shaped spacers are formed by: providing a patterned masking layer (e.g. a patterned layer of photoresist) over the semiconductor substrate to expose the gate pattern and portions of the substrate laterally adjacent the gate pattern; and

selectively depositing a spacer insulating layer over the exposed portions of the substrate, including the gate pattern.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Adam Volentine on 12 July 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toniae M. Thomas whose telephone number is (571) 272-1846. The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:30 p.m.
